

DIRECTOR OF CENTRAL INTELLIGENCE

**Security Committee**

SECOM-D-706

7 November 1979

NOTE FOR: Chairman, DCI Security Committee

1. On 5 November [redacted] visited me to ask 25X1A if SECOM would take on a task of preparing a plan from the DCI to SecDef Brown on how to surface the NRO. The tasking requirement arose from a memo for the record prepared by the DCI following his meeting the week of 22 October with Brown. DCI proposed and Brown was not "negative to" the idea and asked the DCI for a how-to-it proposal.

2. Background: [redacted] included this proposal in 25X1A his end of tour letter to the DCI. [redacted] had also included 25X1A idea of declassifying NRO in his discussion with the DCI on easing up on compartmentation controls to facilitate implementation of APEX. On seeing the DCI's note of conversation with Brown, Ben Evans elected to task CTS to prepare the details of how to surface the NRO. CT sat on it for a week and then returned it to Evans with a claim that they couldn't do the job. They suggested it be assigned to SECOM instead. This led [redacted] to me. 25X1A

I didn't reject the task but proposed that it should and would be better addressed by a larger group than SECOM, to include reps of Dirks' office, the NRO, [redacted] office and probably CTS. [redacted] left to 25X1A discuss with Evans.

Not For RELEASE Outside  
Office of Security

I contacted [redacted] Told him of this situation. 25X1A  
He said that there was already some action going. Seems 25X1A  
DCI sent a short note to [redacted] after reading [redacted]'s end of 25X1A  
tour letter, endorsing [redacted] suggestion to open up the 25X1A  
NRO, and proposing that, in his new job in the Air Force, 25X1A  
[redacted] just do this quietly. [redacted] passed his proposal and 25X1A  
the DCI's endorsement to [redacted]'s office and the 25X1A  
NRO. [redacted]'s office is 25X1A  
point man. [redacted] NRO, is supposedly helping but 25X1A  
in truth is just stalling and doing nothing. [redacted] 25X1A  
is out of it except for what the gossip circuit brings to him. 25X1A  
His opinion - nothing will be done by the NRO and [redacted]  
will not push the issue.

When I passed this info to [redacted] on 8 November 25X1A  
he said that he had already decided with Evans that CTS  
should be required to continue drafting up a plan the DCI  
can send to Brown. Dirks had been consulted and he prepared  
a rambling paper for the DCI suggesting that a careful study  
be made of the advantages and disadvantages. No comment  
back from DCI as of 8 November. [redacted] has gone to 25X1A  
Zeke Zelmer and given him instructions to work up a plan 25X1A  
incorporating Dirks suggestion and to check with the  
Security Committee before sending it to the DCI. [redacted]  
said he would dig up the DCI's endorsement note to [redacted]  
and pass to Zelmer the information about [redacted] 25X1A  
involvement.

3. As of now, there is nothing for SECOM other than  
the coordination task noted above. Sorry for the length  
of this note but I'm sure this issue will come up in your  
talks and you should be aware of the matter from both of  
your views, D/Security and C/SECOM.

[redacted]  
Chief, CSG
